EMEIS

We build thinking systems.

Software that can learn, reason, decide and act. AI agents, GenAI, machine learning, data and IoT, built for production by senior engineers.

22,000+ orders a day run by AI agents

60% lower testing costs

10+ yrs in production at BMW

Since 2013 7 countries, 4 offices

Six things we're very good at.

Agentic AI
Agent teams that run real business processes.

GenAI and LLM apps
Assistants grounded in your own documents and data.

ML and deep learning
Forecasting, anomaly detection, NLP and vision.

Data platforms
Lakehouses and pipelines that give AI clean data.

IoT and edge AI
Sensors, drones and robots that act on data.

Product engineering
Web, mobile, cloud and DevOps, built to scale.

We never start from scratch.

Every project starts from parts we've already built, tested and shipped.

Our own building blocks
In-house UI control library, chat and video-call engine, data import tool and backend frameworks.

Proven with the toughest
Cleared enterprise security reviews.

Fast and secure
Quick to load, hard to break.

A team that adapts
Agile when your plans change.

Automated end to end
Tests and releases run themselves.

Let's build something that thinks.

A senior engineer replies within one business day.
